LETTER OF MAP CHANGE: IMPROVING LOMA & LOMR SUBMITTALS

LETTER OF MAP CHANGE
2006 LOMC
ONE-DAY WORKSHOPS

SPONSORED BY:

CONDUCTED BY:

L. Scott Samuels, P.E., CFM

Description:

This workshop is designed to provide participants with an understanding of FEMA's Letter of Map Change process regarding how to submit a comprehensive application package to FEMA for review. This training will also provide the participant with a background of the NFIP, including basic definitions, common acronyms, and those regulations governing the map amendment and map revision processes.

Objectives:

Upon completion of this training, participants will be familiar with:

- The NFIP regulations that pertain to LOMC requests
- FEMA's processing of LOMC requests
- Managing floodplain development more effectively
- Where to find additional information about the LOMC process

Who Should Attend?

This workshop is intended for those with engineering, surveying, or building science knowledge.

Instructor Bio:

Scott Samuels, P.E., CFM, was the Floodplain Management Engineer for the Floodplain and Mitigation Section of the Missouri State Emergency Management Agency (SEMA) for over 6 years. He was responsible for aiding local officials, consulting engineers, and other interested parties to comply with the rules and regulations of the National Flood Insurance Program (NFIP). Daily activities included explaining the different Letter of Map Change (LOMC) processes, reviewing technical data submitted to communities for compliance, and determination of Base Flood Elevations (BFE's) for participating communities. Prior to joining SEMA in 1998, Mr. Samuels has worked as a project engineer for the City of Portland, Maine and Columbia, Missouri and he has also been a consultant for privately owned surveying/engineering firms in both Portland, Maine and Columbus, Ohio.
